ENTERPRISE CORP. EXPANDS LINC SERVICE® NETWORK IN NORTHEAST OHIO

Twinsburg-based Contractor to Sell Linc Service® in Akron/Canton Area

PITTSBURGH – May 13, 2008 – In an effort to expand their service business, The Enterprise Corp. (aka, Enterprise HVAC Service & Control), a Linc Service® Contractor based in Twinsburg, Ohio, has purchased the franchise rights for the Akron/Canton market.

This marks the second franchise location for Enterprise, headquartered just east of Cleveland, and the sixth overall for Linc, in the state. By signing the new agreement, Enterprise extended its reach across northeast Ohio effective April 1. Though officially recognized as two metropolitan areas, Akron and Canton are separated by just 20 miles and often referred to as a single region, or considered twin cities.

Linc Service Contractors are part of the Linc Service Network, a growing organization with more than 140 members across the United States, Canada, Bermuda, and Mexico. With its newest location, Enterprise will continue following the disciplines of the Linc System® in delivering preventive maintenance – as well as heating, ventilation, and air conditioning (HVAC) service and bundled energy solutions – to the commercial market.

In the short term, Enterprise will manage the Akron/Canton operation from Twinsburg before establishing a local office.

“Customers in Akron/Canton were already familiar with Linc, so we knew it would be a great chance to grow our service business once that territory became available recently,” said Enterprise Principal Dick Starr. “As an organization, we felt ready to expand into a new market, so we’re excited about the opportunities that lie ahead. We’ve had the good fortune to experience success in the Cleveland market by following the Linc System, and we certainly anticipate similar results in the Akron/Canton market.”

A Linc Service Contractor since 1996, The Enterprise Corp. has been serving northeast Ohio’s commercial, industrial, and institutional marketplace with efficient, effective, and dependable automated climate control systems for more than 30 years. The company specializes in HVAC, building control, and certified air/water balance. Enterprise is also one of the Mechanical Service Contractors of America’s (MSCA) “STAR Contractors,” a distinction signifying elite status within the organization as a result of superior technical qualifications and safety records.

“One of the best indicators of success for Linc Service Contractors is their ability, and willingness, to expand their operations using the Linc System,” said Linc President & CEO Scott Giacobbe. “It’s been our pleasure to see Enterprise grow over the years, and we know they will continue providing world-class service and solutions to customers at this new franchise location.”

Linc Network, LLC, headquartered in Pittsburgh, Pa., and Atlanta, Ga., is the franchisor of the Linc System, a business format for operating a commercial heating, ventilation and air conditioning (HVAC) service business. Founded in 1979, the Linc Service Network provides energy solutions to commercial building owners worldwide. For more information, visit Linc’s Web site at www.lincservice.com. Linc Network, LLC, is part of The Linc Group (TLG), one of the nation’s most successful, single source providers of high-value facilities management and building system services. TLG maintains its corporate office in Irvine, Calif. Collectively, TLG companies service more than 20,000 facilities in 45 states and select international markets through a professional workforce totaling more than 2,400 employees. For more information about TLG and its companies, visit www.thelincgroup.com.
