Mechanical Resource Group Joins Linc Service Network

Pittsburgh, Pa. – February 26, 2010 – Mechanical Resource Group, located in Nashville, TN, recently signed a franchise agreement with the Linc Service® Network and will begin selling Linc Service to customers in the greater Nashville area in March 2010.

Founded in 2001, Mechanical Resource Group (MRG) is an HVAC, hydronics, sales and service organization that operates an air conditioning equipment division. As a comprehensive parts and service center for all brands of existing equipment, they provide replacement parts and coils; replacement units; and maintenance training for contractor and owner personnel. MRG also handles all other manufacturers' cooling towers, regardless of age and model. To complete their offering, MRG provides factory warranty service for the multiple brands they represent.

“Mechanical Resource Group’s success starts with our people and their desire to serve as wise counsel to our clients. We work hard to be known as the preferred resource for mechanical needs in Middle Tennessee,” said Matt Fruetel, Mechanical Resource Group’s General Manager. “Joining the elite group of Linc Service Contractors will help us to continue to grow and serve our market the way they deserve.”

As a Linc Service Contractor, they will follow the disciplines of the Linc System® in delivering preventive maintenance to their respected commercial market. They are also currently looking to expand their staff of 18 employees by adding five additional employees by the end of the year.

“Our mission is to support our clients with an attitude of service and leadership; serving our clients, as we ourselves would like to be served, with absolute credibility and technical competency - one relationship at a time,” said Mr. Fruetel. “We do this by employing individuals who live by our mission. It just so happens that they tend to be people with unsurpassed expertise.”

MRG's current hydronics team has more than 110 years of combined experience, and each of their sales engineers have an average of 15 years experience. Since 2006, they have grown significantly and expect to see the same kind of growth over the next several years.

"We feel the Linc System will help us grow much more quickly than if we were to do it on our own," said Mr. Fruetel.

"As a Linc Service Contractor, Mechanical Resource Group joins our growing network of mechanical contractors," said Scott Giacobbe, Linc Network's President & CEO. "With the combination of Linc's proven tools and processes, we are confident that Mechanical Resource Group will continue to thrive within their commercial market."

About Linc Network, LLC

Headquartered in Pittsburgh, Pa., and Atlanta, Ga., Linc Network, LLC is the franchisor of the Linc System[®], a business format for operating a commercial heating, ventilation, and air conditioning (HVAC) service business. Founded in 1979, Linc Service[®] Network, LLC is an international network comprised of more than 150 independent and company-owned mechanical contractors located in the United States, Mexico, Canada, Bermuda, and South Africa.
