### American Electric Technicians Win High Praises from Kaua'i Fire and Ocean Safety

American Electric landed a sole-source electrical maintenance contract with the City and County of Kaua'i. While providing service for electrical distribution systems in all of their facilities on Kauai, TEGG technicians John Melchor and Gavin "Seiji" Yotsuda earned high praise from Deputy Fire Chief Mike Gibson: "John and his co-worker have been absolutely ideal to work with, very professional and courteous – thank you all!"

As Hawaii's only TEGG Service provider, American Electric structures optimized electrical maintenance programs for their clients and helps operations in multiple industries minimize their risks of unplanned electrical outages. Their services include electrical asset management, testing and diagnostics, as well as design, engineering, repair, and upgrade services. American Electric has been a member of the TEGG network since 2005.

Congratulations to expert technicians John Melchor and Gavin "Seiji" Yotsuda on their outstanding professionalism and commitment to stellar service!
